* The mean population for the year is obtained as follows :—To the population at the end of the preceding year add four times the population on the 31st March of the year under review, twice the population on 30th June, four times the population on the 30th September, and the population on the 31st December, and divide the total by 12, which is the method now in use throughout the Commonwealth of Australia. Each quarterly mean is arrived at by adding together the number of the population at the beginning and at the end of the quarter and dividing the sum so obtained by two.

No. 5.—IMPORTS into the State of Western Australia during the Year ended 30th June, 1930.

NOTE A.—On all Imports 10 per cent. has been added to the fair market value of the goods at port of shipment.

NOTE B.—The "Quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size, and consequently do not indicate the number, capacity, or weight of articles imported.

TRADE CLASSIFICATION.

Owing to the grouping of the Import Items into Classes, in lieu of the alphabetical system followed prior to 1918–19 by the Customs Department, it has been decided to insert, for the convenience of the public, a résumé of the classes, together with a slightly condensed index of the items in alphabetical order.

No. 34.—Transactions of the Fremantle Harbour Trust and Bunbury Harbour Board during the undermentioned Periods.

NOTE.—The expenditure bases of the two Corporations are not the same. The Fremantle Harbour Trust employs all labour engaged in handling cargo on the wharves, whereas in the case of the Bunbury Harbour Board, general cargo is handled by the Railway Department for and on behalf of the Board, and bulk cargo by the Stevedores, and no revenue (other than wharfage) is derived therefrom or expenditure thereon incurred. The sinking fund of both Corporations is invested at an approved rate of interest.

*263 of these holdings contain, in addition, alienated lands already separately included under their own heading above. The acreages of such alienated lands have therefore here been excluded.

Note.—The boundaries of District Road Boards have now been adopted as Statistical Districts in lieu of the districts as defined in previous years from the sheet lines of the standard plans of the Lands Department.

NOTE.—In addition to the above figures the following particulars were also obtained:—Acreage Planted Forest Trees, 3,263 acres; Lands farmed on the "Share System": For Cultivation, 97,716 acres, and Dairying, 141 acres. * The reason why Returns relative to certain alienated and leased lands are not obtained under the Statistics Act is mainly to be found in the fact that it has proved impracticable for the Statistical Collectors to enforce the provisions of the Act in connection with lands which remain *entirely unimproved or unstocked*, and also in a lesser degree to the fact that small holdings under one acre in extent are exempted from supplying Returns. The Statistical returns are, however, collected from all lands over one acre in extent on which improvements have been effected, and upon which Agricultural or Pastoral pursuits are carried on, and, therefore, comprise all lands the obtaining of Returns from which would serve any practical purpose.

NOTE.—This table has been compiled with the special object of showing the values of the importations into Western Australia in the past eight years of such products of the soil and of live stock as might in the future be produced within the State, but are at present introduced to supply the deficiency in local production. It serves, in some respects, as a basis for calculations as to the market reasonably to be expected therein for home-grown products.

PART VI.—INDUSTRIAL ESTABLISHMENTS (Exclusive of Mines).

NOTES.—The Industrial Establishments here dealt with are those which, excluding Mines, come under the definition, adopted for statistical purposes, of Industrial Establishments, each being a "factory, workshop, or mill, where either four persons or more have been employed at any one time during the year, or where an engine driven by steam, gas, oil, electricity or water has been used, whatever be the number of persons employed."

Establishments included in Class XX. prior to 1925–26 have since that date been excluded in order to bring the classification of industries into line with other States of the Commonwealth.

The number of persons employed during the year 1929–30 has been computed in accordance with a resolution of the Conference of Statisticians held in 1928. The new method shows the average number of persons employed over the whole year rather than the average over the period worked. Employment figures for previous years have been recomputed on this basis for purposes of comparison. Tables 6 and 7 relating to classification of factories according to number of hands are, however, still computed on the old basis.

No. 1.—Classified numbers of Industrial Establishments (exclusive of Mines) from which Returns were received under the provisions of "The Statistics Act, 1907," and numbers of Males and Females employed, for each of the years 1924, 1928–29, and 1929–30.
